Leveraging Our Footprint Allows KMH To...

1) Corporate Shared Services

We spread our overhead across multiple branch locations thereby allowing each location to operate at a lower cost structure. We in turn pass these derived savings along to our valued customers.

2) Purchasing Power

Due to our large footprint, we leverage our purchasing power to access lower unit prices to pass along to the consumer.

3) Proximity

This allows KMH to transfer the knowledge of our customer's culture and best practices across mutual footprints to help reduce redundancy, rework and other waste to achieve a lower cost structure.

4) Inventory Depth

Our larger customer base allows us to inventory a broader array of products and services. This provides agility and a comprehensive solutions' portfolio to respond to our client's needs.

5) Thought Leadership

Our larger footprint and quantity of experienced employees provides a larger reservoir for sharing knowledge and solutions with our customers.
