Storage Independence

Plastic Bin Storage

Plastic Bin Storage

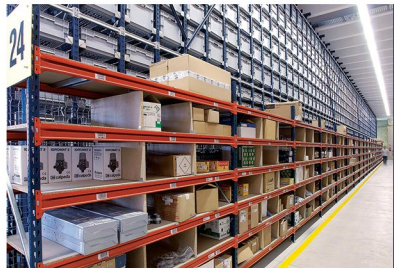

Plastic Bins are ideal for small parts storage in shelving units, bin racks, and bin carts. Bins can be labeled for optimal production processes and increased productivity. Bins are available in a variety of colors and will resist oils, grease and are impervious to most chemicals.

Corrugated Bin Storage

Corrugated Bin Storage

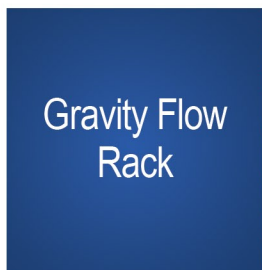

Utilizing bin boxes to organize and sort products saves time, money and resources for various industries. They are particularly advantageous in providing a flexible and affordable solution in warehouse rack "pick and pull" situations. Improve density & increase picking up to 30%. Improve defect rate up to 230%

Wide Span Shelving

Wide Span Shelving

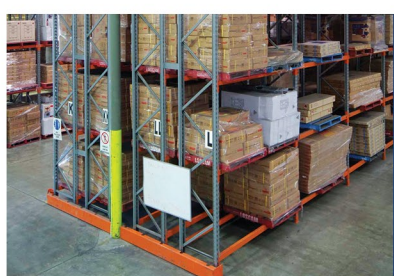

Perfect for hand-stack shelving for medium to heavy loads. Stores small quantities of a large variety of product types. Based on the "man to product" principle, Wide Span Shelving is a flexible, cost effective storage system that can be easily reconfigured.

Gravity Flow Rack

Gravity Flow Rack

Perfect product rotation. More references at the front of shelves. Avoiding any interference in re-stocking and picking of materials. Manual gravity storage system that is ideal to reduce order preparation times.

Conventional Pallet Rack

Conventional Pallet Racking

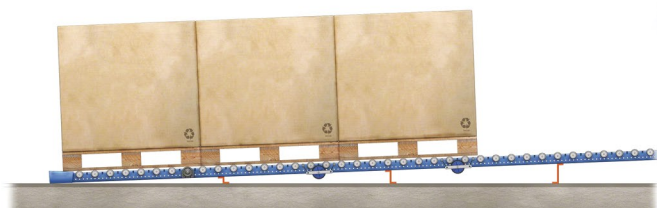

Excellent stock control. Adaptable to any space, weight or size. Can combine with manual picking shelves. Versatile and easy to maintain, with a wide range of accessories to store virtually any load.
