Operational Audit

Most of our engagements begin with an Operational Audit, which allows us to better understand your business while giving you the benefit of our knowledge of industry best practices, uncovered through years of experience by the KMH team. Through our Operational Audit, KMH studies your company culture, product data / throughput, facility layout, operational processes, and customer-driven requirements. We work alongside your key personnel and deliver meaningful recommendations that will provide a measurable ROI when implemented.

Warehousing Solutions

Through our comprehensive network of partners, KMH brings best in class warehouse solutions ranging from simple barcoding systems to fully functional Warehouse Management Systems, Manifesting, Yard Management, TMS and slotting. Based on our knowledge of your operation, we can recommend and implement the solutions that best fit your requirements.

Warehouse Management

In many situations, companies are faced with growing pressures for cost control in their operation. Often times businesses inherit outdated processes and facility design from years of change typically caused by a myriad of customer demand and growth initiatives as well as budget, technological and facility constraints. Traditional silo-based change management practices result in a drastically different design and process flows than might be achieved with enterprise-wide thought, advanced planning, and practical implementation. Thankfully, innovative solutions emerge from this necessity allowing for a wide array of products and services to help companies navigate the dynamics of their business. Warehouse Management Systems represent one such emergence of effective response to operational challenges.

Warehouse Management Systems provide a comprehensive methodology for processing data, product movement, Key Performance Indicators, and customer-driven goals. Some Key Performance Indicators include such disciplines as inventory accuracy, productivity, EDI transmission effectiveness, productivity of labor and equipment, space utilization, and customer satisfaction.

These Key Performance Indicators help companies measure their success in meeting the financial duties of their shareholders and effectiveness in managing operational efficiencies.

Many initiatives contribute positively toward company goals such as good housekeeping, human resource development, technology, and process mapping.

Born from the need for technological efficiency, successful application of a Warehouse Management System derives many benefits for its users. Some of these benefits include:

The Right Fit For You

Whether you're looking for an entry level system to automate data collection and provide real-time information, or a fully functional Tier 1 WMS application providing system-directed workflow in a paperless environment, with integrated Labor, Transportation and EDI, KMH can help you out. From entry level to fully-functional WMS Systems and everything in between, KMH will help you match the right solution for your operation - all the while maintaining a firm connection to your company's culture and identity.

Warehouse Management Benefits

RAPID ROI - Payback Period is measured in months not years

Improved inventory accuracy of over 99%

Elimination of Shipping Errors

Increased Productivity of Labor

Real Time Warehouse Task Updates to Host System

Elimination of Costly Physical Inventories

Elimination of Picking Errors

Optimal Space Utilization

Improved Documentation and Compliance

With this in mind, KMH offers our deep domain expertise to assist in the evaluation of whether or not a Warehouse Management System is right for you. We accomplish this through some simple steps that begin with a complimentary Operational Audit.

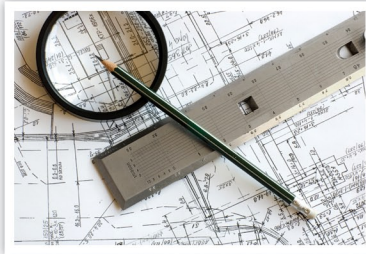

The outcome of this Operational Audit process determines our next step by providing a preliminary project ROI for evaluation. If you want to upgrade your "Where"house to a world-class operation, please contact us to get the ball rolling. We will work closely with your team to ensure a smooth process.
