WHY TRAINING IS IMPORTANT...

MECHANIC TRAINING

Training time is dependant on the number of trainee's and classes of trucks.
Training is a minimum of 3 hours & the classroom can be held at the customers location.

New Technician Basic Skills Workshop

Participants learn how to perform basic maintenance and repair operations on Yale trucks. Includes: safety procedures, basics of electricity and hydraulics, Yale nomenclature, and use of reference materials.

Length Of Course: 3 Days

Prerequisite

- 90 days to 1 year lift truck experience
- Knowledge of workplace safety, and how to use shop tools
- Automotive experience or vocational training is helpful

Inspection Plus Service

This workshop covers the maintenance requirements of today's forklifts: maintaining proper fluid levels, lubrication and filter maintenance. Also reviews proper inspection techniques and required adjustments.

Length Of Course: 2 Days

At KMH, our Mechanic Training courses can be customized to meet **YOUR** requirements and the operational needs of **YOUR** facility.

Basic Electricity

Learn basic electricity concepts: Components, symbols, wiring diagrams and schematic reading, use of meters and test equipment, as well as a review of safety practices. These concepts will help with trouble-shooting Silicon Controlled Rectifier (SCR) and Transistor Controllers.

Length Of Course: 4.5 Days

Prerequisite

- A solid grasp of mechanics and hydraulics
- Knowledge of workplace safety, and how to use shop tools

Advanced Electricity

Covers system operations and how to understand wiring diagrams, trouble-shooting Silicon Controlled Rectifier (SCR) systems and making necessary adjustments. Also covered are transistorized control, testing and systems operations.

Length Of Course: 4.5 Days

Prerequisite

- Basic Electricity
- A solid grasp of mechanics and hydraulics
- Knowledge of workplace safety, and how to use shop tools

Basic Engine

Learn how to maintain and adjust an engine, troubleshoot gas and LP gas fuel systems, and become familiar with electrical and cooling systems by using simple diagnostic tooling.

Length Of Course: 3 Days

Prerequisite

- Basic working knowledge of internal combustion engines

...Your Employees Are Your Most Valuable Resource!

According to the most recent Business & Legal Report, over 150 fatalities and 100,000 injuries occur each year as a result of accidents involving forklifts. Typically, accidents occur as a result of forklifts running into pedestrians, falling off loading docks, and tipping. The result? The loss of valuable employees and compensation disability claims. Since the majority of forklift accidents are caused by operator error, it makes sense that better trained operators mean fewer accidents. In fact, government studies show that effective training programs can improve lift truck safety performance by as much as 70%.

OPERATOR SAFETY TRAINING

Training time is dependant on the number of trainee's and classes of trucks.
Training is a minimum of 3 hours & the classroom can be held at the customers location.

Train The Trainer - Based On Demand

This course is designed to enable the participant to effectively train others to use the Yale Basic Operator Training Package. Features both classroom and hands-on training. Course can be done at the KMH Facility or the customers location. The training course includes a training kit for future use by the trainee.

Length Of Course: 1 Day (8-9 Hours excluding lunch)

Prerequisite

- Mechanical background, basic knowledge of industrial forklifts, fundamental communication skills and a desire to "coach"

In-House Powered Industrial Truck Operator Training - Based On Demand

As demand requires, KMH Systems offers in-house operator training. The classroom portion of this training is accomplished at the KMH Training Center. The practical portion of the training is completed at the employee's job site.

Prerequisite

- No experience necessary

Forklift Operator Safety Training

Complies with OSHA mandates (Sec. 1910.178) to affordably train your employees on your site. Participants will learn the safest operating and maintenance techniques, to reduce costly accidents and avoid citations. Saturday and evening classes also available.

Length Of Course: Approx. 3-4 Hours

Prerequisite

- Mechanical background with the knowledge of the workings of an industrial forklift

Forklift Program Implementation

OSHA expects the employer to implement a training program that ensures a safe industrial truck operation. Recent changes to OSHA standards emphasize site-specific procedures and operator training.

KMH Systems is prepared to assist you in developing a site-specific, written program that will enhance your company's operation and serve as supporting documentation should there be a question regarding compliance.

Call today for written program details and to request a quotation for this service!

CONTACT YOUR LOCAL BRANCH TO SCHEDULE TODAY!

Course dates will be coordinated and announced, based on the needs of the participants. For local branch information use the listing on the back page or visit us online.

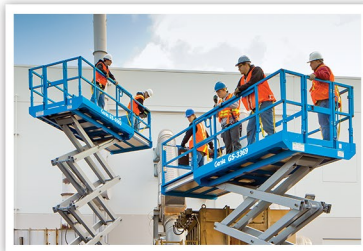

www.kmhsystems.com

KMH Systems is the area's largest lift truck dealer and one of the top complete material handling companies around.

Providing parts and service for all makes and models, KMH specializes in leasing, rentals, new trucks and late-model used trucks, all with warranties. KMH also offers Full and Inspection Plus Service Programs, on-site repairs by factory trained technicians, as well as a full-range of operator training courses.
