JCB Mini Excavator – 2014 – Model 8029

Qty:	Description:
1	<p>The brand new JCB 8029 CTS mini excavator is our first-ever conventional tailswing machine in the current 2.5-3.5 ton class. With a transport weight of 2.7 tons, it's one of the largest excavators you can tow behind a 3.5 ton vehicle. It's similar in many ways to our 8025, but it's been uprated in key areas.</p> <p>This JCB mini digger's power is provided by the new Perkins 400 series Tier IIIa, a transverse 25hp (18kW) motor that delivers 21581lbf (96kN) of torque at 1800rpm. A tailswing of 1ft 5in (470mm) more than the 8025 ZTS, combined with a very low center of gravity, provides a 19% greater lift capacity than the market leader.</p>

Bandit Limb Chipper – 2014 – Model 1590XP

Qty:	Description:	
1	<p>The Model 1590XP Track was recently increased to an 18" capacity chipper, and the towable version has officially become Bandit's most popular hydraulic-feed drum-style chipper. Add mobility in the form of a tracked undercarriage and the machine becomes even more dynamic. The 1590XP Track is best suited for those who specialize in larger tree removals and/or working with fibrous materials. It features a 37" diameter drum, a large 19.75" x 20.5" throat opening, and a powerful feed system made possible by a new extra wide feed wheel option. These factors allow it to effectively compress limby and forked material normally reserved for chippers with a larger capacity.</p>

Total Cost of Equipment:		\$58,578.05

Rayco Limb Chipper – 2013 – Model RC1220

Qty:	Description:	
1	<p>The RC1220 delivers power and productivity the professional user demands. This high-performance 12-inch capacity chipper is powered by Kubota diesel engines in 67hp or 99hp*. Standard features include RAYCO's Versa-Feed infeed control to optimize chipping performance and X-Charge discharge system which injects high velocity air to maximize discharge velocity. A large, 12-inch high by 20-inch wide, infeed opening is 3-inches wider than most competitors, allowing the chipper to handle forked material easier.</p>

Bandit Self Propelled Stump Grinder – 2012 – Model 2450

Qty:	Description:
1	The Model 2450XP is a compact high production stump grinder that will meet the needs of most stump grinding contractors. Reasons for its high productivity include a Kubota 44.2 horsepower turbo charged engine, a massive 50" swing arc, and standard four wheel drive. This unit can be utilized in all types of grinding situations and has even been known to be preferred over some competitive units that are larger in size.

Bandit Self Propelled Stump Grinder – 2012 – Model 2250

Qty:	Description:
1	<p>The Model 2250XP is a revolutionary machine in the small stump grinder segment. Ideally suited both for rental companies and stump grinding professionals, it uses a heavy-duty hydrostatic motor to directly power the cutter wheel, eliminating the need for a clutch, jackshaft, drive belt, belt tensioning system and the many sheaves and bearings associated with those components. This considerably reduces downtime for maintenance, meaning lower cost-of-ownership and a more productive machine.</p>

Rayco Self Propelled Stump Grinder – 2013 – Model RG27

Qty:	Description:
2	<p>Rayco's next generation Super Jr is here! The new RG27 (27hp) and RG35 (35hp) Super Jr stump cutters bring revolutionary design changes to the ever popular Super Jr. These machines are designed to give wider cutting dimensions, lower center of gravity, more traction and floatation, and better visibility while cutting. Their slewing ring pivot design eliminates the maintenance associated with pin style pivots and allows the machine to achieve maximum cutting depth across the entire width of the cut.</p>

Rayco Stump Grinder – 2014 – Model RG100X-R

Qty:	Description:
1	<p>Rayco pioneered the market with hydrostatic drive stump cutters and our flagship RG70X and RG100X offer the ultimate in backyard stump cutting performance. They use powerful Kubota diesel engines in 66.8 hp (RG70X) and 99.2 hp (RG100X) and have hydrostatic cutter wheel drive to let the operator vary cutter wheel rpm independent of engine speed. Wide cutting dimensions keep you working without repositioning the machine and the swing-out control station offers protection from flying debris while providing a good look at the cutting action.</p>

Rayco Stump Grinder – 2014 – Model RG45

Qty:	Description:
1	<p>Turbo diesel power, 4 wheel drive, and a hydraulic backfill blade. And it comes in a self-propelled package that fits through a 36" gate. The RG45 puts together all the features customers want and fits them into a compact diesel stump cutter. Operators appreciate the large cutting dimensions as well as visibility and protection of the swing-out control station. For travel through gates, the control station swings in line. Wide floatation tires and 4 wheel drive allow the RG45 to maintain traction in challenging conditions. A hydraulic backfill blade saves time during clean up, letting you get on to the next job. Also available with optional wireless remote controls.</p>

Scag Zero Turn Mower – 2012 – Model Freedom 61”

Qty:	Description:
1	A new ultra-plush bolstered seat, large diameter steering handles, and rubber iso-mounted foot plate give the operator a comfortable ride. The Hydro-Gear ZT-3400 (61”) or ZT-3100 (52”) hydro transaxles deliver smooth drive power and have spin-on oil filters for easy maintenance. Two independent hydraulic transaxle units with charge pumps and all metal gears. A dual purpose foot pedal brake is standard equipment and makes parking easier than ever before.

Blue Diamond – Attachment – 72” ED Closed Brush Cutter

Qty:	Description:	
1	<p>The extreme duty brush cutter is a high-powered, low flow, direct drive unit with a 2-year warranty. The hydraulic motor drives a 2 5/8” shaft that is housed in 2 massive bearings submerged in oil. Under the deck, instead of a spline shaft, it has a 13” x 1” flange with 10 countersunk bolts connecting the blade carrier. The wire protection kit between the deck and the blade carrier keeps fence wire and vines away from the lower bearing seal and reduces down time from hidden debris. This powerful yet quiet cutter will produce a cleaner cut at a quicker travel speed than was thought possible on a low flow skid steer. The 10” deck clearance and the raised back allow cut debris to escape and to easily avoid bunching under the deck.</p>

Blue Diamond – Attachment – 72” ED Grapple Bucket

Qty:	Description:
1	<p>The extreme duty root grapple has proved itself for many years as an effective and reliable land clearing attachment. The front cross tube helps float the grapple while surface raking and keeps it from diving too deep while root raking. The well engineered geometry of this grapple and the high quality cylinders give it the best clamping force in the industry. All pivot points are 1 1/4” pins in greaseable bushings. This grapple is ready to tackle the toughest of jobs!</p>

Blue Diamond – Attachment – 72” ED Open Brush Cutter

Qty:	Description:
1	<p>This open front brush cutter uses the same drive line as the closed front, but the deck design allows for cutting up to 6” material at ground level. The heavy duty push bar keeps the cut trees from falling back on the skid steer. Hydraulic flow requirements are still only 16 GPMs Minimum so that most 50 HP and larger skid steers can run this cutter with the performance of a high flow cutter! Never has such high performance, commercial grade work been accomplished by a low flow machine!</p>
