

Vision-Guided Towing Attachment

GP8 towing attachment

Savings. Safety. Productivity. Seegrid's Robotic Industrial Trucks Deliver.

So advanced, it's simple. With the GP8 Towing Attachment, you have the power and flexibility of two machines in one. Delivering pallets across your facility? Utilize the unmanned GP8 in standard operation mode for vision-guided technology transport. Does your workflow require carts to deliver products and components? Attach your carts to the unmanned GP8 Towing Attachment and have parts delivered across your facility without wires, tapes or lasers. Once deliveries are completed, the Robotic Industrial Truck returns for more work.

The Seegrid® series of Robotic Industrial Trucks gives you the most in operational flexibility. From a single truck to multiple units, you can have a complete vision-guided system - more savings, safety and productivity.

Specifications

Available on GP8-single only

Capacity

Max. Tugging Capacity 8000 lbs
Learns and Stores up to 25 Miles of Routes
Unlimited Individual Routes

Travel Speed (Auto Mode)

2.7 MPH Loaded & Unloaded
0-Full Speed in 4 Seconds at Full Load

Travel Speed (Manual Mode)

2.3 mph Max.

Electrical

System Power: 24V DC
Red SB-175 Power Coupling (Configurable)

Battery

Battery amp/hr Capacity - Min: 510, Max: 750
Battery Compartment (LxWxH): 31" x 13.25" x 31.62"
Battery Weight Min: 800 lbs
Battery Weight Max: 1500 lbs
Battery Change Roll Deck Standard

Dimensions and Weight

Width: 36"
Length with Forks - Single: 82.4"
Height - with Camera: 83",
- with Camera and Beacon: 90.75"
Truck Weight With Attachment: 1490 lbs (675.85 kg)

Capabilities

Minimum Outside Turning Radius 83"
Up to 5% Grade

Safety

ANSI /ITSDF/ISO All Applicable Standards
EasyView LED Lightstack
Independent Laser Obstruction Sensing System
Curtis 1297 Traction Controller

Cost Effective Initial Investment AND Low Total Cost of Ownership

Seegrid's vision-guided Robotic Industrial Trucks deliver affordable transport with a rapid payback period. This provides you with flexibility and benefits to spare, including:

- Allows your workers to focus on higher value tasks within your facility
- Perform multiple routes for one shift and easily change routes for second and third shifts
- Continuous flow of parts to support and optimize lean manufacturing initiatives
- Meet and exceed performance standards by lowering manned travel distances
- Quickly and efficiently train your personnel on set-up and maintenance on familiar platforms, reducing reliance on third party vendors and lowering costs in the process
- Consistent safe behavior and controlled truck speeds improve facility safety
- With Seegrid's **WalkThroughThenWork**® technology, your GP8 Towing Attachment sets up in hours, not weeks or months

216 Park West Drive
Pittsburgh, PA 15275
