

DP50 (separable pallet version)

DP30 (integral pallet version)

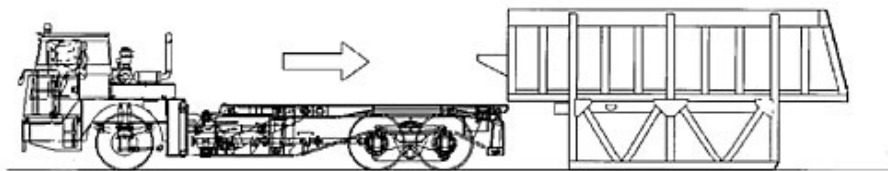

## » Applications

Transport of steel stock, steel scrap, and other heavy materials

## » Features

### ► Separable pallet version

- The loading wait time is reduced to improve cycle time.
- No pallet loading shock.

### ► Excellent roadability

Constant 4-wheel drive system with a center differential reduces steering wheel slipping, thus causing less damage to the road surface.

### ► Reduced maintenance costs

Forced brake cooling system prolongs the life of brake discs and axles.
