

44236 Series

6,000 lbs - 8,000 lbs load capacity

The Omega Lift **44236 Series** comes in standard 4-wheel drive, 4-wheel steer. This heavy duty all terrain forklift excels in the construction field because of its tough build and high ground clearance. Whether used in general construction or yard work, this powerful and versatile forklift is up to the challenge of any job.

ARM Series

6,000 lbs - 30,000 lbs load capacity

This versatile telescopic handler can be used for many applications. A powerful powertrain, joystick operated controls and a solid steel frame are just a few standard features of the **ARM & ARM-XL Series**. A wide variety of attachments are also available for this Omega Lift series of machines.

UG Series

6,000 lbs - 16,000 lbs load capacity

The **UG SERIES** are purpose-built all-terrain forklifts that have been specifically designed, engineered and manufactured to meet and exceed stringent mining and military standards. The UG Series is well suited for supporting production in the rigors of mining applications as well as in-theatre military operations.

OMEGA LIFT has been designing and manufacturing all-terrain lift trucks for a wide range of material handling applications for over 30 years. With an on-site engineering department, our dedication to quality can be seen from our focus on design to the quality components that go into every Omega Lift machine. Quality workmanship has placed Omega Lift at the forefront of the lift truck market. Customized packages including a variety of masts, booms, and unique application attachments are available. Machines have either 24" or 48" load center designs.

Material Handling Solutions by

Omega Lift

You provide the job.

Omega Lift provides the machine.

4D Multiloader Series

6,000 lbs – 22,000 lbs load capacity

The Omega Lift 4D Multiloader (**4DML Series**) is a 4-directional, all-wheel drive, all-wheel steer, and all-wheel brake truck that does multi-duty as a 4-directional reach truck, a traditional forklift and a sideloader. In addition to handling pallets, long loads can be negotiated through constricted aisles and narrow doorways with ease, resulting in increased storage.

ALPHA Series

6,000 lbs load capacity

The muscular **ALPHA Series** is a solid rough terrain machine that provides the robust build quality of the larger Omega Lift models in a compact, efficient package. The exceptional maneuverability of this 4-wheel drive, 4-wheel steer machine ensures that it is perfectly suited for applications where space is limited.

2X Series

6,000 lbs – 14,000 lbs load capacity

Built to the same tough standards as all Omega Lift machines, the **2X Series** is available in 2-wheel or 4-wheel drive and ranges in lift capacity from 6,000 to 14,000 lbs. This versatile 2-wheel steer forklift comes with various mast and carriage sizes to handle yard, construction, or any other rough terrain application with ease.

MEGA Series

8,000 lbs – 22,000 lbs load capacity

This powerful forklift covers many applications. From lumber and steel to general heavy lifting, it can handle loads up to 22,000 lbs. The **MEGA Series** is capable of 48" load centers and features a strong frame and mast design to handle extra heavy loads. If you have a unique or heavy load to lift or move, this is the machine for you.

HERC Series

25,000 lbs – 70,000 lbs load capacity

The HERC Series is available in capacities ranging from 25,000 lbs @ 24" load center to 70,000 lbs @ 48" load center. This full time 4-wheel drive forklift comes standard with 2-wheel steering and a powerful, emission compliant 6-cylinder Diesel Engine. The HERC-Series has carved a unique niche in the marketplace by combining extreme heavy-duty load carrying capacities with full time all-terrain capabilities.
